

COLOMBIA: HUMMINGBIRDS & TANAGERS OF THE WESTERN ANDES

A Special departure for Tucson Bird Alliance
APRIL 7-15, 2026

©2025

White-necked Jacobin (*Florisuga mellivora*)

Given its impressive avifauna (Over 2000 species), Colombia is the dream destination for birders all over the world. Part of this richness is due to the branching of the imposing Andes into three ranges, called the Eastern, Central and Western Andes. Two rivers dissect these mountains and with the elevational gradient, it has triggered a rich process of endemism. Considering the presence of steep slopes and species associated with each elevational range we have found the perfect mix of lodges and hotels to create a tour that will expose you to the best birding of the Western Andes and provide the opportunity to see and photograph many species of hummingbirds and tanagers at bird feeders in addition to our regular birding outings.

Our nine-day tour will focus on two locations found in premontane and montane forest on both slopes of the Western Andes and additionally, it will offer some birding in a wetland contiguous to the Cauca River. The tour starts with a visit to Laguna Sonso, a wetland that is a remnant of the original vegetation around the Cauca River. Here we will be seeking Jet Antbird, Greenish Elaenia, Black-bellied and Fulvous

whistling-ducks, Little Cuckoo, Snail Kite, Spectacled Parrotlet, Bar-crested Antshrike, the miniscule Slate-headed Tody-Flycatcher and the brightly colored Western Emerald.

We will then start ascending the Andes to Finca La Huerta, a small inn that allows us to visit a cloud forest birding location—the protected area of the Río Bravo. Birding the road that crosses this impressive patch of forest will give us the opportunity to look for Crowned Woodnymph and White-throated Wedgebill as well as colorful birds such as Andean Motmot; Red-headed Barbet; and Bay-headed, Metallic-green, Scrub, and Golden tanagers. Also, the Colombian endemic Crested Ant-Tanager can be seen here as well as Uniform Antshrike and Black-winged Saltator. As we search for birds, we will be serenaded

continuously by the musical voice of the Andean Solitaire and the repetitive notes of the Black-billed Peppershrike. We might come across feeding flocks that may include Grayish Piculet, Golden-olive Woodpecker, Montane Woodcreeper and Red-faced Spinetail. There is a small bridge where we have seen Andean Cock-of-the-rocks in flight. After two nights in La Huerta, we will descend to the Cauca River valley to continue up the Andes again, to our next location.

The second lodge will allow us to visit five birding areas. From the comfortable Araucana Lodge we plan to make daily drives to La Minga, La Florida, Doña Dora bird feeders, San Felipe, and Bosque

Bar-crested Antshrike (*Thamnophilus multistriatus*)
© D. Ascanio

de Niebla in the famed El Kilometro 18 or “KM 18” area. Each location will offer new hummingbirds and tanagers as well as other birdlife. Collectively, we should get about 20 species of hummingbirds and more than 20 species of tanagers, including Saffron-crowned, Golden, Bay-headed, Blue-capped, Golden-chested and Golden-naped. The drive to the Anchicaya road will expose us to other fascinating birds such as the Toucan Barbet, Torrent Duck, Violet-tailed Sylph and White-capped Dipper. During our tour, we plan to have early breakfasts, followed by birding sessions at feeding stations, forest edges, roadsides, and wetlands.

Golden-naped Tanager (*Tangara ruficervix*) © D. Ascanio

Red-faced Spinetail (*Cranioleuca erythrops*) © D. Ascanio

When not moving between locations, we will enjoy resting time after lunch and will resume our birding in the afternoon. There will be no strenuous walks or steep trails. There will be an optional night outing. VENT has offered tours to various locations in Colombia since 2009 and our program offerings continue to grow. A booming economy and well-established peaceful culture that has called victory over violence will reshape your view of Colombia and its efforts towards long-lasting peace.

Participants must be aware that Colombia's infrastructure is still basic, with little development. Although this is changing rapidly, expect some lengthy drives between locations. We will make every possible effort

to stop along the drives to stretch, find birds and enjoy the scenery, making these drives more enjoyable.

April 7, Day 1: Arrival in Cali. Upon arrival at *Alfonso Bonilla Aragón International Cali Airport* (airport code CLO), you will be met by a representative of our ground agent and transferred to our hotel in Cali. Participants should plan to arrive this afternoon since we plan to start tomorrow at around 6:00 a.m. The trip begins this evening with a get-acquainted meeting followed by an early dinner. Some participants may wish to arrive early in Cali or Bogotá. Bogotá, Colombia's bustling capital city of more than seven million, with its signature by red-tiled roofs and mountains all around. Past participants have opted to arrive early and spend a day or two here before beginning our tour. The short flight from Bogotá to Cali is about an hour. There are many activities in Bogotá including the Botero Museum; the stunning Gold Museum, which boasts an exquisite array of pre-Columbian gold artifacts in beautiful displays; numerous striking cathedrals; and nearby birding at sites such as the Monserrate Mountain and the El Dorado marshes, both within the city limits. The views of the imposing Eastern range of the Andes will be spectacular from almost anywhere in the city. Upon request, VENT will be happy to assist with hotel reservations for early arrivals.

NIGHT: Eco Hotel Hacienda El Diamante, Buga, Valle del Cauca (1,018 meters – 3,340 feet elevation)

Golden Tanager (*Tangara arthus*) © D. Ascanio

April 8, Day 2: Birding Laguna Sonso; Drive to La Huerta. Our morning starts with a drive to a protected area, Laguna de Sonso. The importance of this wetland lies in the fact that the Cauca River was once surrounded by an exuberant moist forest, but today's sugar cane industry is threatening this important habitat. Established in 1987, it has become a regular site to look for widespread species such as Black-bellied and Fulvous whistling-ducks, Snail Kite, Limpkin, and egrets as well as Bare-faced and Glossy ibises. But there will be target species including Apical Flycatcher and the beautiful Spot-breasted Woodpecker, which frequently shows up to inspect branches, hoping for an insect meal. We may enjoy a vocal Little Cuckoo that could surprise us if it ever landed in the open! There will be ample photographic opportunities including a small flock of Spectacled Parrotlets zooming around or a Bar-crested Antshrike pumping its tail as it sings from the forest edge. Once it starts warming up, it will be time to start driving to the highlands but before that, we will enjoy a rich Colombian lunch in a town near the wetland.

In the early afternoon we will start ascending the Western Andes to our headquarters for the next two nights. The hotel itself is located in farmland that is close to protected forest areas. Some typical forest edge species that can be seen around the hotel include Yellow-backed Oriole, Lineated Woodpecker and Black-winged Saltator. In some years we have found the prehistoric-looking Striped Cuckoo singing from the top of a bush.

NIGHT: Hotel La Huerta, dept. Valle del Cauca
(1,500 meters – 4,920 feet elevation)

April 9, Day 3: Reserva Natural Cañón del Río

Bravo. Packed with tree ferns, epiphytes, orchids and moss-covered trunks, the wonderful premontane humid forest (cloud forest) of Cañón del Río Bravo is a protected area that offers exceptional birding opportunities. Our birding will be easy walking along the unpaved roads. Although the birdlife is very rich, one cannot take anything for granted. We hope for an overcast day which keeps bird activity high. In previous years we have come across White-booted Racket-tail and Crowned Woodnymph, also Masked Trogon and Red-headed Barbet have been seen. The target species won't be that colorful but are important because of their restricted distribution, including Grayish Piculet, and Parker's Antbird (previously considered part of Dusky Antbird). Other more widespread but interesting species include Uniform Antshrike, White-throated Daggerbill (previously part of Wedge-billed Hummingbird), Black-billed Peppershrike and Black-headed Brushfinch. In the afternoon, we will explore mountain rivers and hope to see an Andean Cock-of-the-rock commuting to a lek, where young males continue to display almost year-round. Our list may round up several tanagers for the day, including White-lined, Rufous-throated, Scrub, Bay-headed, Golden and Metallic-green.

Saffron-crowned Tanager (*Tangara xanthocephala*)
© D. Ascanio

NIGHT: Hotel La Huerta, dept. Valle del Cauca (1,500 meters – 4,920 feet elevation)

Purple-throated Woodstar (*Calliphlox mitchellii*) © D. Ascanio

April 10, Day 4: Drive to Araucana. An optional early morning outing will find us in the surroundings of La Huerta. We might see Lineated Woodpecker, Brown-capped Vireo, Squirrel Cuckoo or Bronze-winged Parrot. As we enjoy the morning birdlife, we will surely be serenaded with the penetrating song of the Tropical Mockingbird and maybe welcomed with the unique roar of the Venezuelan Red Howler.

After breakfast we will start driving back to the Cauca Valley to ascend the Western Andes again, but this time along the old Cali-Buenaventura Road. Here the forest patches are larger although threatened by agricultural projects. We will stop for lunch in a local restaurant called “*Aqui me quedo*” (restaurant name translates to “I am going to stay here”). Because the terrace faces a canopy of forest edge, we may see canopy species at eye

level, including the Red-faced Spinetail and Golden-faced Tyrannulet. Besides having the opportunity to see canopy dwellers, we will enjoy close hummingbird views of White-necked Jacobin, Brown Violetear, Bronzy Inca, White-booted Racket-tail, Fawn-breasted Brilliant, Crowned Woodnymph, Andean Emerald, Rufous-tailed Hummingbird and the bumblebee-sized Purple-throated Woodstar!

Continuing our drive up along the Western Andes, we will eventually reach Araucana Lodge, our home for the next five nights. In the lodge gardens there are hummingbird feeders and bird tables with fruit. Time allowing, we will explore the gardens and trails surrounding the lodge where White-necked Jacobins fan their tails to set foraging territories and a Green Hermit visits the feeders at irregular intervals. Also, the wonderful Black-throated Mango should be present. In addition, Andean Emerald will come cautiously because it will have to deal with a territorial Steely-vented Hummingbird that will be defending the feeder from intruders.

White-booted Racket-tail © David Ascanio

NIGHT: Araucana Lodge, dept. of Valle del Cauca (1,600 meters – 5,600 feet elevation)

April 11, Day 5: La Minga. Following breakfast, we will load our van and drive for a little over an hour to a wonderful little paradise, La Minga. Surrounded by primary forest of the Río Bitaco reserve, this is the prime site to look for the astonishing Multicolored Tanager. But, aside from this amazing species, the list of wonderful species found here will be jaw dropping! Starting with toucanets and motmots and continuing with a parade of hummingbirds that include Green and Tawny-bellied hermits, Long-tailed Sylph, Brown

Multicolored Tanager (*Chlorochrysa nitidissima*) © D. Ascanio

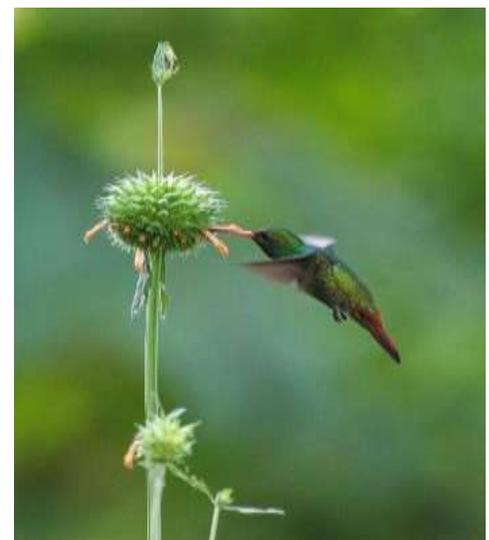

Violetear, White-necked Jacobin, Bronzy Inca, and Speckled and Steely-vented hummingbirds. The bird list also includes colorful birds such as Blue-winged Mountain Tanager; Saffron-crowned, Golden, Scrub and Black-capped tanagers. Green Honeycreepers as well as Rusty and Masked Flowerpiercers join roving foraging flocks that we will enjoy taking in the colors of these amazing Colombian gems. We will enjoy lunch here and relax in the gardens of the lodge before heading back to Araucana, although it will be hard to leave this wonderful site.

NIGHT: Araucana Lodge, dept. of Valle del Cauca (1,600 meters – 5,600 feet elevation)

April 12, Day 6: La Florida and Bosque de Niebla. After breakfast we will take a short drive to La Florida, a small property hosting forest bird species that are normally labeled as “impossible-to-see.” This site has become famous for having a feeder where Chestnut Wood-Quail come for a few minutes right after dawn. Although there are mornings when this secretive species doesn’t show up, we believe that it’s worth the effort to try to see it. In the same area we have also seen another astonishing bird, the White-throated Quail-Dove.

We will continue birding the forest edge along the road, weather permitting. We will be looking for colorful Metallic-green, Saffron-crowned, Purplish-mantled, Scrub and Golden-naped tanagers. We might come across noisy flying flocks of Scarlet-crowned Parakeet. Inside the thick forest canopy, Scaled and Green-and-black fruiteaters may give their unique vocalizations and Northern Chestnut-breasted Wren should be heard giving its distinct ethereal song.

To match the morning field trip, we have reserved another special treat for the afternoon, Bosque de Niebla. This location also hosts hummingbird feeders and you will find yourself overcome by the buzzing action of dozens of hummers zipping around. Some birds are common and visit often, but others, like the Blue-headed

Rufous-tailed Hummingbird (*Amazilia tzacatl*)

Sapphire, will take time to locate. Bosque de Niebla is a photographer's and bird lover's paradise. You will never tire of seeing so many hummingbirds careening around the garden, all in iridescent plumage

NIGHT: Araucana Lodge, dept. of Valle del Cauca (1,600 meters – 5,600 feet elevation)

April 13, Day 7: Comederos Doña Dora; Alto Anchicaya Road. Today will take us to the west slope of the Western Andes, facing the Choco region.

After a relatively moderate drive we will get to a small property, run by a family that has set out bird tables and hummingbird feeders.

Among the hummingbirds, we may see White-necked Jacobin, Rufous-gaped Hillstar and the impressive Empress Brilliant. There might also be a pair of Toucan Barbets as well as more subtle birds such as Lemon-browed Flycatcher and Golden-faced Tyrannulet. The bird table will probably be hosting Golden, White-lined and Silver-throated tanagers and the conspicuous Bananaquit should be observed too. During our return to the lodge, we will make a couple of stops to look for Tricolored Brushfinch, a bird of semi-open areas. Today will surely be a highlight of the tour, not only for its birds but also for its wonderful landscape and flora associated with each forest type.

Toucan Barbet © David Ascanio

NIGHT: Araucana Lodge, dept. of Valle del Cauca (1,600 meters – 5,600 feet elevation)

April 14, Day 8: San Felipe Nature Reserve; Cauca Valley. This private reserve features, many feeders that attract a dozen species of hummingbirds and more than ten species of tanagers are likely. White-booted Racket-tail and White-throated Daggerbill are both possible here. Blue-winged Mountain Tanager and Golden-naped Tanagers will brighten the feeders and nearby forests. In the woods nearby we will seek Chestnut Wood-Quail, Colombian Chachalaca, and the Sickle-winged Guan.

NIGHT: Araucana Lodge, dept. of Valle del Cauca (1,600 meters – 5,600 feet elevation)

April 15, Day 9: Return to Cali; Departure for Home. An optional early morning walk around the lodge gardens will allow us to search for Slaty Spinetail, which usually keeps out of sight. Also, a nice assortment

of colorful birds may show up on the bird table including Crimson-backed, Blue-gray, Palm and Flame-rumped tanagers. The forest edge surrounding the lodge hosts other more insectivorous avifauna such as Streaked Xenops, Yellow-olive Flycatcher, Chivi Vireo and Black-billed Peppershrike, the latter being a great consumer of chili peppers!

We will depart from the lodge after breakfast, arriving in time for flights departing Cali airport no earlier than 1:00 p.m.

TOUR SIZE: This tour will be limited to 10 participants.

TOUR LEADERS: Luke Safford, Brian Gibbons, and Alejandro Nagy

Luke Safford currently serves as the Director of Engagement & Education for Tucson Bird Alliance, which includes overseeing the Southeast Arizona Birding Festival, field trip and event programs, the Tucson Nature Shop, and student education opportunities. He started birding and keeping a life list when he was six years old in Washington State thanks to his grandparents. His favorite place to bird is at Sweetwater Wetlands where he's been leading a weekly walk with Tucson Audubon since he moved to Arizona in January 2015. Luke lives in Tucson with his wife, Jolene, and teenagers Ashtyn and Brock.

Brian Gibbons grew up in suburban Dallas where he began exploring the wild world in local creeks and parks. Chasing butterflies and any animal that was unfortunate enough to cross paths with the Gibbons boys occupied his childhood. A wooden bird feeder kit sparked a flame that was stoked by a gift of the *Golden Guide* and family camping trips to Texas state parks. Thirty-five years ago, Brian attended two VENT camps for young birders. Birds are now his primary interest, but all things wild continue to captivate him. After college, Brian undertook a variety of field biology research jobs that have taken him to the Caribbean, the Bering Sea, and the land of the midnight sun, arctic Alaska. He enjoys working with kids, hoping to spark environmental awareness through birds. For many years Brian's field research has involved bird banding. His most amazing recoveries were a female Wilson's Warbler that had been banded in Alaska and was captured by

Brian in Colorado, and a Sooty Tern that perished after a hurricane on the Texas coast; it had plied the Gulf of Mexico and the oceans of the world for 24 years. Brian's recreational bird-seeking has taken him to Machu Picchu in Peru, the Great Wall in China, the plains of East Africa, and the Himalayas in Nepal. Brian leads birding trips in the United States, Mexico, Central America, the Caribbean, and Europe. As well as being a fanatical eBirder, he loves capturing birds with photography. He lives in Tucson, Arizona with his wife, Lacreia Johnson, and their son, Grayson.

Alejandro "Alex" Nagy, was born and raised in the city of Caracas, Venezuela. Despite growing up in the city, he had permanent contact with outdoors and wildlife throughout his childhood and teen years. Birding and ornithology came at the age of 20, when he became part of the staff at the William H. Phelps ornithology collection in Caracas, taking an active part on everything that involves a bird museum. He had also been a long-time bird-bander at the Portachuelo banding station in Henri Pittier National Park (Venezuela) where he has first confirmed records for the country of Caribbean Martin, Chimney Swift, and Worm-eating Warbler among others. Alex has also been part of important expeditions to rediscover enigmatic species such as the Orinoco Softtail and the Tachira Antpitta. He's also been a field assistant in bird-sound studies, something that has given him tremendous skills in bird identification by vocalizations. Alex started

leading birding tours in Venezuela in the year 2000, at the world famous Hato El Cedral cattle-ranch and nature reserve, and later on throughout the country. This passion took him to move to Colombia with his wife Esmeralda in 2018, coleading tours with David Ascanio and also Steve Hilty. He had also become an avid eBirder, soon-to-be regional reviewer, and always on the look for new birds, whether they're county, state, regional or even better, lifers. Alex is a leader with a charming humble personality, always cool and calm under pressure and with tons of patience. His outstanding human quality and passion for birds and nature will make you enjoy and absorb every aspect of a VENT program.

FINANCIAL ARRANGEMENTS: The fee for this tour is **\$7,095** per person in double occupancy and includes all meals beginning with dinner on Day 1 to breakfast on Day 9, accommodations as stated, ground transportation during the tour and guide services provided by the tour leaders. The tour fee does not include roundtrip airfare from your home to Cali and return, airport departure taxes, alcoholic beverages, special gratuities, telephone calls, laundry, or items of a personal nature. Rates are based upon group tariffs; if the tour does not have sufficient registration, a small party supplement may be charged. A portion of the proceeds from this tour will be donated to Tucson Bird Alliance.

The single supplement for this tour is **\$890**. You will be charged a single supplement if you desire single accommodations, or if you prefer to share but have no roommate and we cannot provide one for you.

REGISTRATION & DEPOSIT: You may register for this tour through the VENT [website](#) or by calling our office (512-328-5221). The deposit for this tour is **\$1,000** per person. We accept MasterCard and Visa. If you choose not to register online, you may pay your deposit by credit card, check, money order, or bank transfer. If not paying online, or by card, your tour space will be held for 10 days pending receipt of your deposit.

PAYMENTS: All tour payments may be made by credit card (MasterCard or Visa), check, money order, or bank transfer (contact the VENT office for bank transfer information). These include initial deposits, second deposits, interim payments, final balances, special arrangements, etc. Full payment of the tour fee is due 150 days (November 8, 2025) prior to the tour departure date.

CANCELLATION & REFUNDS:

Cancellation by Participant:

Refunds, if any, for any cancellation by a participant are made according to the following schedule: If participant cancels 180 days or more before the tour departure date, a cancellation fee of **\$500** per person will be charged unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months from the date of participant tour cancellation, in which case the cancellation fee will be **\$100** per person. If cancellation is made between 179 and 151 days before departure date, the deposit is not refundable, but any payments covering the balance of the tour fee will be refunded. If cancellation is made fewer than 150 days before departure date, no refund is available. This policy and fee schedule also applies to pre- and post-tour extensions. **For participants’ protection, we strongly recommend the purchase of travel insurance that covers trip cancellation/interruption.**

| | |
|--|--|
| <u>If participant cancels:</u> | <u>Participant’s refund will be:</u> |
| 180 days or more before departure date | Participant’s deposit minus \$500* |
| 179 to 151 days before departure date | No refund of the deposit, but any payments on the balance of the tour fee will be refunded |
| 150 days or less before departure date | No refund available |

*Unless the deposit is transferred to a new registration for another VENT tour that will operate within the next 12 months from the date of participant tour cancellation, in which case the cancellation fee will be \$100 per person. To qualify, cancellation must occur 180 days or more before departure date; deposit transfers must be made at the time of cancellation; and one transfer per deposit.

Cancellation by VENT:

If VENT cancels a tour prior to departure without cause or good reason, VENT will provide the participant a full refund, which will constitute full settlement to the participant.

If VENT cancels or delays a tour or any portion of a tour as a result of any Force Majeure event, VENT will use its reasonable best efforts to refund any payments on the balance of the tour fee to participant; provided that, VENT will have no obligation to provide a participant with a refund and will not be liable or responsible to a participant, nor be deemed to have defaulted under or breached any applicable agreement, for any failure or delay in fulfilling or performing any term of such agreement. A “**Force Majeure**” event means any act beyond VENT’s control, including, without limitation, the following: (a) acts of God; (b) flood, fire, earthquake, hurricane, epidemic, pandemic or explosion; (c) war, invasion, hostilities (whether war is declared or not), terrorist threats or acts, riot or other civil unrest; (d) government order, law or actions; (e) embargoes or blockades; (f) national or regional emergency; (g) strikes, labor stoppages, labor slowdowns or other industrial disturbances; (h) shortage of adequate power or transportation facilities; and (i) any other similar events or circumstances beyond the control of VENT.

This VENT Cancellation & Refunds policy does not apply to air tickets purchased through VENT or to any special arrangements, such as additional hotel nights, that fall outside of the services described in the tour itinerary.

Victor Emanuel Nature Tours is not a participant in the California Travel Consumer Restitution Fund. California law requires certain sellers of travel to have a trust account or bond. This business has a bond issued by Travelers in the amount of \$50,000. CST #2014998-50.

TRAVEL INSURANCE: To safeguard against losses due to illness, accident, or other unforeseen circumstances, we strongly recommend the purchase of travel insurance as soon as possible after making a deposit. VENT has partnered with **Redpoint Travel Protection** as our preferred travel insurance provider. Through Redpoint, we recommend its comprehensive Ripcord plan, which includes a medical evacuation benefit. With this in mind, it is important to note that medical evacuation is not offered by Redpoint as a stand-alone policy or benefit. For travelers not interested in comprehensive travel insurance, VENT recommends **Medjet** and its **MedjetAssist**® plan. Medjet is not an insurance company, and Medjet Assist is not an insurance product; rather, Medjet is a membership-based air-medical transport company specializing in moving hospitalized travelers from an admitting hospital to a medical facility of choice. Medjet does not provide medical evacuation service from the point of injury or illness; yet, the MedjetAssist plan offers robust enough travel protection to satisfy the medical evacuation insurance requirement in place for many VENT tours.

About Ripcord

Ripcord is a completely integrated travel insurance program with single contact for emergency services, travel assistance, and insurance claims. Critical benefits include comprehensive travel insurance for trip cancellation/interruption, **medical evacuation from your point of injury or illness to your hospital of choice**; medical expense coverage, death of pet, and much more. Optional expanded insurance coverage is available and includes items such as evacuation coverage in case of a natural disaster or political or security reasons, waiver for pre-existing medical conditions exclusion, and a “Cancel for Any Reason” benefit. Ripcord is available to U.S. and non-U.S. residents.*

For a price quote, or to purchase travel insurance, please visit: ripcordtravelprotection.com/ventbird; or click the **Ripcord** logo on our website (click Help and Trip Insurance); or call +1-415-481-0600. Pricing is based on age, trip cost, trip length, and level of coverage.

*To be eligible for the pre-existing medical condition exclusion waiver and the optional Cancel for Any Reason (CFAR) upgrade, you must purchase your policy within 15 days of making your first trip payment. The CFAR benefit provides reimbursement for 75% of covered costs, and increases the policy premium by approximately 50%. Policies may be purchased either for the full value of the tour fee at the time of deposit or in segments as individual tour payments are made (deposit, second deposit, final balance, additional arrangements, etc.). The “pay as you go” approach reduces up-front expense and ensures that the amount paid toward your full policy premium is in proportion to the amount paid toward the full tour fee. If you choose to “pay as you go,” you must cover each deposit or payment within 15 days, and ensure all non-refundable trip costs in order to maintain the CFAR benefit. Please refer to the policy for a full description of coverage.

Coronavirus (COVID-19):

Redpoint considers COVID-19 illness as any other seasonal respiratory illness. Providing only a positive Covid-19 test result will likely not be considered a covered event per the terms and conditions of the company's policy. Redpoint maintains a [Coronavirus FAQ page](#) on its website that addresses questions and concerns travelers may have regarding COVID-19 and Redpoint's policy. We strongly recommend that you visit the page for an overview of relevant topics.

About MedjetAssist

MedjetAssist is a membership program that functions like AAA for motorists. The company's primary service is air medical transport. Critical benefits of MedjetAssist include a staff on call and ready to provide assistance 24 hours a day, 7 days a week; all-expenses-paid air medical transport in the United States and internationally to medical facility of choice, regardless of medical necessity; repatriation of remains; and no exclusions for pre-existing conditions.

For travelers under 75, MedjetAssist may be purchased as Short-Term Memberships of 8, 15, 21, and 30 days, or Regular Annual Memberships from 1 to 5 years. For travelers 75–84, Medjet offers a Diamond Membership that is the same program but with a few additional conditions.

For a price quote or to purchase MedjetAssist, please visit: [Medjet.com/VentBird](https://www.Medjet.com/VentBird) or call 1-800-527-7478. Pricing is based on type and term of membership.

FUEL AND FUEL SURCHARGES: In the uncertain, often volatile oil market, it is difficult – if not impossible – to predict fuel costs over the long term, and more specifically, at the time of operation of this departure. Our prices are based upon the prevailing fuel rates at the time of itinerary publication. While we will do everything possible to maintain our prices, if the fuel rates increase significantly, it may be necessary to institute a fuel surcharge.

EXCHANGE RATE SURCHARGES: In the erratic global financial markets of today, it is difficult to predict foreign currency exchange rates over the long term or at the time of operation of a tour or cruise departure. Tour prices are based upon the rate of exchange at the time of itinerary publication. If exchange rates change drastically, it may be necessary to implement a surcharge. If a surcharge is necessary, every effort will be made to minimize the amount. In many cases, these additional foreign exchange rate surcharges are passed to VENT by its vendors and suppliers.

AIR INFORMATION: Victor Emanuel Travel is a full-service travel agency and wholly owned subsidiary of Victor Emanuel Nature Tours (VENT). Victor Emanuel Travel will be happy to make any domestic or international air travel arrangements from your home and return. Per person fees apply for each set of travel arrangements: \$50 domestic; \$75 international.* Many of our travelers choose to make their own air travel arrangements, but we emphasize the benefits to using our services. If you book your air arrangements yourself, Victor Emanuel Travel is unable to provide support in managing any flight delays and/or cancellations that could occur before and during a tour. When you purchase air tickets through Victor Emanuel Travel, our staff has ready access to your air ticket record and can provide assistance as problems arise. Please feel free to call the VENT office to confirm your air arrangements. Please be sure to check with the VENT office prior to purchasing your air ticket to confirm that the tour is sufficiently subscribed to operate. VENT cannot be held responsible for any air ticket penalties.

*An air ticket will be purchased by Victor Emanuel Travel on behalf of the traveler with the traveler's consent. A purchase is considered final upon receipt of payment. If a ticket is subsequently reissued at the behest of the traveler (i.e. voluntary change of plans), the same fee rates apply for the reissue process, in addition to any fees that may be charged by the airline.

BAGGAGE LIMITS: All tour participants are asked to limit their luggage to a single bag of no more than forty-four pounds (20 kilos) and a single carry-on item such as a small backpack. Luggage space on our buses and 4x4 vans is limited, and excessive baggage may have to be stored in passenger seats, thus limiting seating options in our vehicles. Therefore, we ask that you adhere to the luggage limits outlined above both

for your comfort and for the comfort of others on the trip. Please pack in duffels with wheels if possible as these will fit better in our buses and will be more useful in the lodges where we stay. Amenities at the lodges and hotels vary. At hotels, there should be porter service, but we cannot guarantee them at the lodges. When packing, we urge you to give thought to traveling lighter rather than heavier. We also recommend that you bring a few plastic bags or dry bags large enough to protect your clothing and/or luggage in case of rain.

LAUNDRY: We recommend that you bring sufficient clothes to see you through the trip and/or bring items that can be washed and will dry quickly (i.e. COOLMAX® shirts, etc.) in your rooms. Laundry is, unfortunately, not available at most locations.

CLIMATE: Weather conditions can be variable due to the wide range of habitats and elevations visited. Lowland areas on the Anchicaya road and Laguna Sonso can be hot and humid (temperatures in the high 80s to low 90s). Most other sites where we stay are in the mountains. Light weight gloves and a warm hat will be useful in the morning hours. Participants should dress in layers for changing conditions. Morning temperatures can be quite chilly to moderate in the mountains but are likely to be warm midday. Participants should expect some rain as the Colombian Andes generally receive fairly high rainfall.

CLOTHING: Lightweight field clothing is generally the rule. Please do not wear white or brightly colored clothes, including hats or raingear, as it may frighten shy birds and animals and is likely to emphasize any movements that you make. At lower elevations, we suggest loose-fitting khaki clothing or other cotton clothing in a dark green, dark blue, tan or brown shade. Military camouflage clothing should not be worn as it conveys an inappropriate image to police and military personnel, whom we are likely to encounter at various highway checkpoints. Also, please avoid nylon or plastic jackets and/or rainwear of similar materials; noisy clothing is annoying to others and may frighten birds and animals. Long pants and long-sleeved shirts are recommended as protection against insects. A long, waterproof poncho or rain jacket; warm sweater or down jacket (or light jacket and down vest combination in layers); warm hat; and gloves may be needed for the higher elevation sites which can be chilly (but not freezing) early in the morning. Bring a broad-brimmed hat for sun protection and a good sunscreen. Footwear should include Gore-Tex water-resistant/waterproof hiking boots, and perhaps a second pair of walking shoes and/or sneakers. Rubber boots are not necessary on this trip although there may be some muddy or wet areas on roads. Shower things will be useful.

HEALTH: VENT follows Centers for Disease Control and Prevention (CDC) recommendations for standard travel precautions, which includes vaccination against a variety of preventable diseases. Among these so-called Routine Vaccinations are measles/mumps/rubella (MMR) vaccine, diphtheria/pertussis/tetanus (DPT) vaccine, poliovirus vaccine (boosters for adult travelers), and Varicella (Chickenpox). You should also be up-to-date with Hepatitis A and Hepatitis B vaccinations.

If you are taking personal medication, prescription or over-the-counter, be sure to bring an ample supply that will allow you to get through the tour safely. Please consult your physician as necessary. Remember to pack all medication in your carry-on baggage, preferably in original containers or packaging. As airline baggage restrictions can change without warning, please check with your airline for procedures for packing medication.

COVID-19: We continually emphasize that our number one priority is the health and safety of our customers and employees. Although VENT no longer maintains any of its COVID-era prevention protocols, we strongly recommend best practices for protecting yourself and your fellow travelers against COVID-19

illness. These measures include receiving the primary series vaccinations for those eligible, staying “Up to Date” with COVID-19 booster shots, wearing high filtration N-95 or KN-95 masks when in airports and on airplanes, and avoiding risky social settings in the lead-up to your tour. These recommendations are firmly rooted in CDC guidance regarding recommendations for avoiding COVID-19.

Malaria has been confirmed in Colombia, including the chloroquine-resistant strain in rural areas. However, it is not expected to be a problem on this route. While not a requirement for entry into Colombia unless you are arriving from an infected area in another country, a yellow fever vaccination is a good idea for most people traveling to third world, tropical countries, and the vaccination is good for 10 years. People with compromised immune systems should consult with their personal physician before getting any vaccination. Leishmaniasis is a disease transmitted by a small fly that is mainly active at dusk or during the night. It is not a common insect and only a few of the flies are disease carriers; proper clothing and the use of insect repellent are your best protection, and this disease is not considered a threat on this route. Dengue fever also is very infrequent and is transmitted by day flying *Aedes aegypti* mosquitoes. Finally, after the Zika virus outbreak, cases have been documented in Colombia. It also is transmitted by the same day flying *Aedes aegypti* mosquito that transmits Dengue. Again, proper clothing and use of some insect repellent, especially in lowland areas, is the best protection.

In addition to your physician, a good source of general health information for travelers is the U.S. Centers for Disease Control and Prevention (CDC) in Atlanta, which operates a 24-hour recorded Travelers’ Information Line (800) CDC-INFO (800-232-4636). You can check the CDC website at <https://wwwnc.cdc.gov/travel>. Canadian citizens should check the website of the Public Health Agency of Canada: <https://www.canada.ca/en/public-health.html> (click on Travel Health).

INSECTS: Insects should not be a problem over most of our route (the highlands should be particularly free of biting insects), but depending on rain, we could encounter a few biting insects. We are not expecting to expose you to any chigger country. However, it is impossible to determine whether a given area will have chiggers or not. As a precaution, we recommend you wear loose-fitting long pants and long-sleeved shirts, and bring bottles or roll-on sticks of “Cutter” or similar insect repellents. Spraying shoes, socks and the lower portion of pants with insect repellent will help reduce problems with unexpected chiggers. Pants pretreated with permethrin are also helpful. We urge that you not bring very strong-scented “natural” repellents, if possible, because these often have strong unpleasant odors that are inappropriate in group situations.

Insect Repellents – There are insect repellents for the skin and an insect repellent used to treat clothing that should not be applied to the skin.

Insect repellents for the skin are commonly available in three forms:

- DEET (N,N-diethyl-meta-toluamide): A chemical compound that is marketed under various brand names (OFF!®, Cutter™, Ultrathon™, etc.) and offered in a variety of formulations including sprays, lotions, time-release preparations, and disposable wipes. The formulations will state a percentage of the active ingredient DEET on the packaging. DEET may be applied to exposed skin directly and/or sprayed on clothing. Please be careful when applying DEET as it can damage plastics and lens coatings.
- Picaridin: A synthetic formulation that is derived from piperine, a substance found in plants that produce black pepper.
- Herbal insect repellents: Various mixtures of organic ingredients such as oils from eucalyptus, citronella, cedar, and other herbs. The herbal repellents are more difficult to categorize because of

the difference in ingredients from one brand to another. There is considerable variation in their effectiveness.

An insect repellent for clothing is marketed in one approved formulation:

- Permanone® (Permethrin) is an odorless spray-on repellent that may be used for **pre-treatment** of clothing, gear, and tents. It should not be used directly on the skin or sprayed on clothing while it is being worn. The pre-treatment process requires a number of hours to complete and must be done outdoors, so is best completed in advance of travel. Do-it-yourself pre-treatment has to be repeated more often than commercial treatment using Insect Shield® technology. It is available at various outdoor stores and can easily be found online.
- Insect Shield® apparel: Clothing pre-treated with Permanone is made by a variety of manufacturers. It is available for purchase from some sporting goods suppliers. The clothing is advertised as retaining its repellency for up to 70 washings.

The US EPA offers a search tool to help choose a repellent that is best for a particular situation. For example, some repellents work for mosquitoes, but not for ticks.

<https://www.epa.gov/insect-repellents/which-insect-repellent-right-you>

A Note About Chiggers: This tour visits areas where chiggers are known to occur. Chiggers are tiny parasitic mites found in most warm weather areas of the southern United States and the world's tropics. They are especially numerous in grassy areas, where, in the immature stage, they attach themselves to other animals or humans who make contact with the grass as they pass by. Chiggers do not suck blood and the majority of species do not carry disease. They do feed on bodily fluids through a process in which a digestive enzyme is produced by the chigger which essentially liquefies the skin around the area where the chigger is attached. The chigger is not usually attached to the skin for more than a few hours before it either falls off or is knocked off. Our bodies respond by producing a hardened area as a defense against the chigger's digestive enzyme. Though the chigger may be long gone, it is the presence of the hardened area, and the body's natural process of reabsorbing it that typically causes intense itching, often lasting for a week or more. Chiggers like to attach themselves to areas of thin skin, like around the ankles, beltline, undergarment lines, knees, and elbows.

Chiggers can be avoided by following these procedures:

- Avoid walking or standing in areas dominated by grass. These areas are where one is most likely to encounter chiggers.
- Tuck your pants into your socks to avoid direct skin-to-grass contact. Chiggers can find their way through clothing, but this is a standard and effective prevention technique.
- Apply insect repellent to your skin and clothing. Please refer to the Insect Repellent section that follows for important information about selecting and applying repellent.
- Powdered sulfur applied to waist, bottoms of pants, sock and boots is also effective at repelling chiggers. However, be warned that clothes will retain the sulfur odor for several washings. If using sulfur, never touch your eyes, nose, or mouth before washing your hands first.
- Shower at the end of each day in the field. Use a washcloth to vigorously rub your legs, feet, and ankles.

By following these methods, you should be able to avoid all chigger bites, as well as tick bites. If, however, you are bitten by chiggers anyway, you can reduce or eliminate the symptoms by applying benzocaine or hydrocortisone creams, calamine lotion, After Bite, or any number of anti-itch products.

CURRENCY: Colombian Peso (COP). We recommend that you exchange all or most of your dollars at the

international airport upon arrival. ATMs are available in the airports and many other public sites where you can obtain local currency (and generally give the most favorable exchange rates).

DOCUMENTS: A valid passport is required for U.S. citizens, with one blank page for entry stamp. We recommend your passport be valid for at least six months beyond your planned departure. A visa is not required; a tourist card will be issued by the airline. Non-United States citizens should check with their local Colombian consulate or embassy.

EQUIPMENT: We strongly recommend that participants bring a WIDE-mouth water bottle that can be easily refilled (from a large 10-gallon tank in the bus). A day pack is essential; a small, compact umbrella is highly recommended; and raingear (rain jacket or poncho) and plastic bags for water-proofing gear in the field can be useful. Earplugs may come in handy at a couple of the hotels.

BINOCULARS & SPOTTING SCOPES:

Binoculars – We strongly recommend good binoculars of at least 7x35, 8x42, 10x40, or 10x42 magnification. We recommend that you do NOT bring mini binoculars of any kind. Some people like them because they are small and lightweight, but they have an extremely small field of view and very poor light gathering power. Trying to find a bird in your binoculars using minis is like trying to read a book through a keyhole. You will be very frustrated, and even if you do manage to get the bird in your binoculars before it flies, you will have a poor view. You will find that 7x35 or 8x42 binoculars are compact and light enough.

Spotting Scopes – Your tour leader will have a scope available for group use throughout the trip; however, if you prefer to bring your own scope, you should feel free to do so.

MISCELLANEOUS ITEMS: There will be opportunities to recharge batteries for electronic equipment at virtually all locations where we stay, but participants should bring enough spare batteries to last for a few days between charges in case of unplanned electrical outages. Electrical plug-ins in Colombia usually are two flat-pin type (same as in USA) and electrical current is 110 volts in virtually all areas (but always check first as 220 to 240 volts may be found in a few areas). If you plan to recharge batteries, bring appropriate converters; a surge protector also is recommended. Because much of this route traverses relatively remote regions where the variety (although not quantity) of food may be limited, we recommend that everyone, including especially those persons with dietary restrictions or other dietary requirements, bring at least some snacks and other emergency food items that are portable.

INTERNET ACCESS: Colombia is one of the most “wired” countries in South America and most hotels and lodges have internet access and Wi-Fi (at least in the lobbies if not actually in hotel rooms). Also, for those with the appropriate SIM card chip in your mobile phone (iPhone, Samsung, etc.) or iPad, you should be able to connect via one of Colombia’s main telecommunications services such as CLARO, AVANTEL or MOVISTAR (CLARO and AVANTEL have more coverage in remote rural areas). Sometimes this entails a trip to a local telecommunications service center, something best done before the trip begins. Cell phone access is now virtually country-wide in Colombia, although a few sites located in deep valleys may not reception (this is usually a local issue). Before leaving home, we suggest that you check with your personal service provider for roaming rates and coverage use areas pertaining to your personal calling plan.

SUGGESTED READING: A number of traditional booksellers and online stores list excellent inventories of field guides and other natural history resources that will help prepare you for this tour. We recommend www.amazon.com which has a wide selection; www.buteobooks.com and www.nhbs.com which specialize in ornithology and natural history books; and www.abebooks.com for out-of-print and hard-to-

find titles.

Field Guides (Birds):

- Hilty, S. L. 2021. ***Birds of Colombia***. This is the recommended field guide for Colombia. Forward looking taxonomy includes all species and subspecies groups (as in Clements checklist). Illustrations are from 16-vol. *Handbook of Birds of the World* (Lynx) with many updates and additions. All species, as well as subspecies, and subspecies groups are illustrated and mapped. Unique for South America, this book contains a QR code for every species, which allows users to quickly link, via mobile phone, to Cornell's *Birds of the World* website and listen to vocalizations, view photos, and read an expanded text. Almost like having an App embedded in this book (and Colombia has remarkably good cellular coverage so this feature should be usable almost everywhere). Available from Lynx Editions <https://www.lynxeds.com>. Also available from Buteo Books/ABA sales, and elsewhere.
- Ayerbe-Quiñones, Fernando. 2019. ***Birds of Colombia***. Wildlife Conservation Society. Small and compact book with fine, well-organized, computer-generated illustrations; a detailed map (with color-coded subsp. distributions) accompanies each species. No text but has comments pertaining to each genus. Lacks useful index (only Order, Family and genus but not English names). Small size and accurate illustrations make this book very useful in field but paper cover (as well as all inside pages) printed on low-quality paper easily damaged by contact with moisture (always carry it inside a plastic bag for protection and do not let water reach this book). Now shown as available on Amazon. There is also a Spanish-language edition (2018).

Butterflies:

- D'Abrera, Bernard. *Butterflies of South America*. Australia: Hill House, 1984. Good pocket guide, covers many genera with pictures. Taxonomic most likely out of date.

Natural History:

- Hilty, Steven. *Birds of Tropical America: A Watcher's Introduction to Behavior, Breeding and Diversity*. University of Texas Press, 2005. Highly recommended for background information on how things work in bird communities in tropical latitudes; topics include diversity of birds, hummingbird communities; mixed species flocks; antbirds and army ants; colorfulness, song structure in relation to environments, and much more.
- Kricher, John C. *The New Neotropical Companion*. Princeton: Princeton University Press, 2017. Excellent broad-based resource on just about everything from plants and birds to insects, herps and mammals in the Neotropics.
- Forsyth, Adrian, and Ken Miyata. *Tropical Nature: Life & Death in the Rain Forests of Central and South America*. New York: Scribners Sons, 1984. Does not deal much with birds but is a fantastic introduction to all kinds of topics relating to tropical wildlife including bugs, frogs, plant strategies, bot flies, and much more. Extraordinarily well written. Excellent introductory reading on tropical natural history.

- Stap, Don. *A Parrot without a Name: The Search for the Last Unknown Birds on Earth*. Austin: University of Texas Press, 1991. An account of field expeditions with Ted Parker and John O'Neill, among others.

Apps:

- *Merlin Bird ID*. Cornell Lab of Ornithology. The best app to use in the field. Nowadays considered the “future of birding.” Once the app is downloaded, you must download the packs for Colombia. Includes a brief bird description, photos and voices. Also, there is a section for Bird Photo ID which can be useful. **HIGHLY RECOMMENDED.**
- *Ebird*. Cornell Lab of Ornithology. A friendly and essential tool for the modern birdwatcher, this is nowadays your best way to keep your life list, all in a single application. Users can compile personal bird lists by location and by trip. When taxonomic splits are incorporated, your list will be automatically updated. Furthermore, your guide will be able to share the daily list. You can just accept the shared list from your VENT leader and have it uploaded in your account! An essential tool to promote bird conservation. **HIGHLY RECOMMENDED.**
- iNaturalist. This is arguably the largest citizen science project in the world. Uploading photos of unknown species (birds, plants, amphibians, butterflies, etc) will give you the opportunity for identification and discussion with scientists around the world **HIGHLY RECOMMENDED.**
- *MAPS.ME*. This app allows you to navigate offline. Detailed maps, all free of cost. Once the application is downloaded, you will have to download the map (s) for Colombia.
- *GPX Tracker* This app allows you to navigate using geographical coordinates. You will need to download the specific map in each area using Wi-Fi, all free of cost. **HIGHLY RECOMMENDED.**
- *Bird Data*. A free app that provides summarized information for each species, including the subspecies and presence in neighboring countries. It has a section of endemic species. Look for the Colombia package. Providing that you have data access in your phone, it will show the eBird hotspots near your location, thus being one of its main advantages.
- *The Birds of Colombia*. IMB publicación. A basic app showing a list of the birds of Colombia based in taxonomic order and arranged by family. Contains an ornithological dictionary.
- *All Birds Colombia*. Sunbird Images. Blue Level Series. Available in Apple Store. This app was made from the information in *Birds of Northern South America* by R. Restall, et al (Helm Field Guide). It contains images, maps and bird voices. The user must be aware that the maps used from the publication were out-of-date at the time of printing. The most powerful aspects are the bird voices and the sonograms accompanying each species as well as the search tools. Good source to study the voice of the birds and get acquainted with the plumage and other aspects of the species natural history.
- *Colombia – guía de viaje y mapa offline*. Tripwolf. The free download provides limited information. A good source for those wanting to learn about culture, important dates and other aspects of the country. To access all the information, an upgrade must be purchased.

Further Reading:

Porup, J, K. Raub, C. Soriano & R. Reid. *Lonely Planet Guide to Colombia*, latest edition. A good

introduction to Colombia life, culture and just getting around the country. A little time with this or a similar travel book in the latest edition should provide a richer travel experience for almost anyone. Also see Colombia Handbook, Rough Guide, Bradt Travel Guide, and the highly rated Michelin Green Guide Colombia.

Abad Gomez, Hector, *Manual de Tolerancia*. 2018. An interesting compilation of documents and notes written by Hector Abad Gomez about the civil conflict that took place in Colombia for many decades, currently available only in Spanish.

Resources to Explore Before the Tour:

- Erize, Francisco, Jorge Rodriguez Mata, and Maurice Rumboll. ***Birds of South America, Non-Passerines: Rheas to Woodpeckers***. Princeton, New Jersey, USA: Princeton University Press, 2007. Generally good illustrations and useful written descriptions of the non-passerine birds of South America. A good complement to the two volumes by Ridgely and Tudor listed below.
- Ridgely, Robert S., and Guy Tudor. ***The Birds of South America, Volume I: The Oscine Passerines: Jays, Swallows, Wrens, Thrushes and Allies, Vireos, Wood-warblers, Tanagers, Icterids and Finches***. Austin: The University of Texas Press, 1989. Very useful reference, with range maps and illustrations of many species not previously illustrated. (<http://birds.cornell.edu>; select “Audio Guides”).
- Ridgely, Robert S., and Guy Tudor. ***The Birds of South America Volume II: The Suboscine Passerines: Ovenbirds and Woodcreepers, Antbirds, Gnateaters, and Tapaculos, Tyrant Flycatchers, Manakins and Cotingas***. Austin: The University of Texas Press, 1994. Very useful reference, with range maps and illustrations of many species not previously illustrated by the year of printing. (<http://birds.cornell.edu>; select “Audio Guides”)
- Ridgely, Robert S., and Guy Tudor. ***Field Guide to the Songbirds of South America: The Passerines***. University of Texas Press, 2009. This book condenses the text from the two previous references into a single volume with many additional illustrations (400+ species). It has more of a field guide format, and provides consistently excellent illustrations and text for the vast majority of Brazilian passerines. This plus the Erize, Mata & Rumboll guide to the Non-Passerines would give good coverage of the vast majority of Brazilian birds.

Movies and Documentaries:

Colombia Wild Magic. Netflix. This documentary presents a kaleidoscope of images of one of the most biodiverse countries in the world.

TIPPING: An important part of the value of a VENT tour is knowing that tips for local service providers at our destinations—restaurant staff, hotel staff, drivers, local guides, and various other support staff—are included in your tour fee. If you would like to offer any of your local guides an additional tip, \$5 to \$10 a day is a common amount.

Tips for your VENT tour leader(s) are **not** included, but it is customary to tip one or both if you feel that you have received exceptional service. To assist in your planning, we recommend tipping your VENT tour leader(s) \$15 to \$20 per day, or the equivalent of approximately 2–4% of the tour fee.

If you plan to give tips by cash, they should be given directly to your tour leader at the end of the tour and **not** sent to the VENT office. Some of our tour leaders use mobile payment applications such as Venmo, PayPal, and Wise. If you would like to use this method, please ask your tour leaders directly whether they can accept tips through such an application.

We emphasize that tipping is optional and that these amounts are only recommendations. The amount you decide to tip is based entirely on your experience and at your discretion.

RESPONSIBILITY STATEMENT: Victor Emanuel Nature Tours, Inc., a Texas corporation, and/or its agents (together, “**VENT**”) act only as agents for the participant in regard to travel, whether by railroad, motorcar, motorcoach, boat, or airplane and assume no liability for injury, damage, loss, accident, delay, or irregularity which may be occasioned either by reason of defect in any vehicle or for any reason whatsoever, or through the acts or default of any company or person engaged in conveying the participant or in carrying out the arrangements of the tour. VENT accepts no responsibility for losses or additional expenses due to delay or changes in airfare or other services, sickness, weather, strike, war, quarantine, terrorism, or other causes. All such losses or expenses will be borne by the participant, as tour rates only provide for arrangements for the time stated.

VENT reserves the right (i) to substitute hotels of similar category, or the best reasonable substitution available under the circumstances, for those indicated and (ii) to make any changes in the itinerary that are deemed necessary by VENT or which are caused by third party transportation schedules (i.e. railroad, motorcar, motorcoach, boat, airplane, etc.).

VENT reserves the right to substitute leaders or guides on any tour. Where VENT, in its sole discretion, determines such substitution is necessary, it will notify tour participants.

VENT reserves the right to cancel any tour prior to departure with or without cause or good reason. See the VENT Cancellation & Refunds policy set forth above.

Tour prices are based on tariffs and exchange rates in effect on May 19, 2025, and are subject to adjustment in the event of any change thereto.

VENT reserves the right to decline any participant’s Registration Form and/or refuse to allow any participant to participate in a tour as VENT deems reasonably necessary, in its sole discretion. VENT also reserves the right to remove any tour participant from any portion of a tour as VENT deems necessary, in its sole discretion, reasons for such removal include but are not limited to, medical needs, injury, illness, inability to meet physical demands of a tour, personality conflict or situations in which such removal is otherwise in the best interest of the tour, the tour group and/or such participant. A participant may also voluntarily depart from a tour. If a participant is removed from a tour or voluntarily departs from a tour, such participant will be responsible for any expenses associated with such removal or departure, including but not limited to, transportation, lodging, airfare and meals, and VENT will have no obligation to refund or reimburse any such removed or departed participant for any tour payments or deposits previously paid by such participant.

Baggage is carried at the participant’s risk entirely. No airline company, its employees, agents and/or affiliates (the “**Airline**”) is to be held responsible for any act, omission, or event during the time participants are not on board the Airline’s aircraft. The participant ticket in use by any Airline, when issued, will constitute the sole contract between the Airline and the purchaser of the tickets and/or the participant.

The services of any I.A.T.A.N. carrier may be used for VENT tours, and transportation within the United States may be provided by any member carrier of the Airlines Reporting Corporation.
